Product Description

API Pharmaceutical White Powder Lifitegrast CAS 1025967-78-5 Standard

Indication

Lifitegrast is a leukocyte functional antigen 1 antagonist used for the treatment of dry eye. Lifitegrast can bind leukocyte functional antigen 1 (LFA-1) and prevent LFA-1 from binding to its homologous intercellular adhesion molecule-1 (ICAM-1). ICAM-1 is overexpressed in corneal and conjunctiva tissues of patients with dry eye disease, and LFA-1 binds to ICAM-1 to promote the formation of immune synapses, resulting in T cell activation and migration to target tissues. In vitro studies have shown that Lifitegrast can inhibit the adhesion of T cells to ICAM-1 and also inhibit the secretion of inflammatory cytokines in human peripheral blood mononuclear cells. The exact mechanism by which Lifitegrast treats dry eye is unclear.
