Product Description

Organic Intermediates VidofludiMus CAS 717824-30-1 with High Quality

Vidofludimo is a drug that has attracted a lot of attention in recent years and is considered to be an effective drug for improving anxiety and depression symptoms. Anxiety and depressive symptoms are prevalent mental health problems in contemporary society, placing a significant burden on patients and their families. Therefore, developing a drug that can effectively relieve these symptoms is of great significance for promoting people's mental health.

Vidofluradimo is a selective material transporter 2 (SERT) inhibitor that affects mood and emotion by regulating chemicals within the brain. Specifically, it inhibits the activity of serotonin transporter 2, thereby increasing the transfer of serotonin between neurons. Serotonin is a neurotransmitter that plays an important role in regulating mood, sleep and anxiety, among other things. Therefore, Vidofluradimo's mechanism of action allows it to effectively improve anxiety and depression symptoms.
